Indian Institute of Tropical Meteorology

(2014-2015)

Section 1: Vision, Mission, Objectives and Functions

Vision

To make the Indian Institute of Tropical Meteorology (IITM), Pune a World Centre of Excellence through basic research on all aspects of Tropical Ocean-Atmosphere System required for improving the Tropical Weather and Climate Forecasts

Mission

To develop outstanding research talent for improving the skill of weather and climate forecasts in the country through development of appropriate Training Program. To advance understanding of variability and predictability of the tropical coupled ocean-atmosphere-land system through basic research by undertaking relevant scientific programmes. To develop tools for seasonal and extended range prediction of monsoon and to take up research program to improve the skill. To collaborate with other similar research institutions, in the development and application of climate study.

Objectives

- 1 To conduct basic research in all aspects of atmosphere-ocean-land system with special reference to the tropics required to improve weather and climate forecasts of tropics.
- 2 To develop a system for seasonal and extended range prediction of Indian monsoon and improve its skills.
- 3 To develop expertise in understanding physics and dynamics of clouds required to improve the representation of cloud processes and their interaction with large scale environment in models.
- 4 To generate reliable answers to all science questions related to regional climate change in the backdrop of global climate change.
- 5 To build trained human resource in the field required by the country.

Functions

- 1 The IITM functions as a National Centre for basic and applied research in Tropical Meteorology
- 2 To conduct basic research in all aspects of atmosphere-ocean-land system with special reference to the tropics required to improve weather and climate forecasts of tropics.
- 3 To organize interdisciplinary research aimed at understanding the fundamental atmospheric and oceanic processes controlling weather and climate in tropics and its practical application to the society (e.g. prediction & predictability)
- 4 To generate reliable answers to all science questions related to regional climate change in the backdrop of global climate change.
- 5 To develop necessary infrastructure.
- 6 To build trained human resource in the field of atmospheric and oceanic sciences required by the country.

Section 2: Inter se Priorities among Key Objectives, Success indicators and Targets

Objective	Weight	Action	Success Indicator	Unit	Weight	Target / Criteria Value				
						Excellent	Very Good	Good	Fair	Poor
						100%	90%	80%	70%	60%
[1] To conduct basic research in all aspects of atmosphere-ocean-land system with special reference to the tropics required to improve weather and climate forecasts of tropics.	18.00	[1.1] To implement, evaluate, validate and improve the forecast skills of Coupled Climate Forecast System (CFS) for seasonal and extended range forecast.	[1.1.1] Research Papers published in peer reviewed journals of good impact factor	No. of papers published	4.50	20	16	13	10	8
		[1.2] To study the role of internal and external forcing that regulates the Indian summer monsoon rainfall variability on intraseasonal, interannual and inter-decadal time scales.	[1.2.1] Research Papers published in peer reviewed journals of good impact factor	No. of papers published	4.50	20	16	13	10	8
		[1.3] To develop regional chemistry-transport air pollution model with baseline air quality and meteorological input and to study the regional transport of pollutants and simulate short term air quality level and long term chemical-climate scenarios.	[1.3.1] Research Papers published in peer reviewed journals of good impact factor	No. of papers published	4.50	9	8	7	6	5
		[1.4] Set up the System for Air Quality Forecasting and Research (SAFAR) for real time monitoring and forecasting air quality in a metropolitan city	[1.4.1] Date of completion of work	Date	4.50	14/09/2014	14/10/2014	14/11/2014	14/12/2014	14/01/2015

Section 2: Inter se Priorities among Key Objectives, Success indicators and Targets

Objective	Weight	Action	Success Indicator	Unit	Weight	Target / Criteria Value				
						Excellent	Very Good	Good	Fair	Poor
						100%	90%	80%	70%	60%
[2] To develop a system for seasonal and extended range prediction of Indian monsoon and improve its skills.	18.00	[2.1] To build a working partnership between the Academic R & D Organizations and the Operational Agency to improve the monsoon forecast skill under the Monsoon Mission	[2.1.1] Funding the approved proposals	No. of proposals	6.00	7	5	3	2	1
		[2.2] To set up a state of the art dynamical modelling framework for improving prediction skill of seasonal extended, short and medium range prediction systems	[2.2.1] Issuing of experimental forecast to IMD	No. of times issued per yr	5.00	4	3	2	1	0
		[2.3] To carry out model sensitivity experiment	[2.3.1] Carrying out Experiments with CFS model	No. of Experiments	5.00	4	3	2	1	0
		[2.4] To publish research results	[2.4.1] Research Papers published in peer reviewed journals of good impact factor	No. of papers published	2.00	12	10	8	6	4
[3] To develop expertise in understanding physics and dynamics of clouds required to improve the representation of cloud processes and their interaction with large scale environment in models.	18.00	[3.1] To analyze the observational data collected during the national program of CAIPEEX carried out with instrumented aircraft (s) during the 11th Five Year Plan period	[3.1.1] Research Papers published in peer reviewed journals of good impact factor	No. of papers published	7.20	20	17	14	10	8
		[3.2] To study cloud microphysics through	[3.2.1] Research Papers published in peer	No. of papers	7.20	15	14	12	11	9

Section 2: Inter se Priorities among Key Objectives, Success indicators and Targets

Objective	Weight	Action	Success Indicator	Unit	Weight	Target / Criteria Value				
						Excellent	Very Good	Good	Fair	Poor
						100%	90%	80%	70%	60%
		ground based continuous observations of clouds and aerosol at High Altitude Cloud Physics Laboratory at Mahabaleshwar in Maharashtra.	reviewed journals of good impact factor	publishe d						
		[3.3] To study thunderstorms and lightning under different environments.	[3.3.1] Research Papers published in peer reviewed journals of good impact factor	No. of papers publishe d	3.60	15	14	12	11	9
[4] To generate reliable answers to all science questions related to regional climate change in the backdrop of global climate change.	18.00	[4.1] To carry out development of Earth System Model (ESM), dynamical downscaling of regional climate and analysis of model outputs and publish the results.	[4.1.1] Research Papers published in peer reviewed journals of good impact factor	No. of papers publishe d	9.00	6	5	4	3	2
		[4.2] To make high resolution projections of future monsoon climate until 2100 for different climate scenarios for various impact assessment studies (e.g., climate, water resources, agriculture, health, etc) and publish the results.	[4.2.1] Research Papers published in peer reviewed journals of good impact factor	No. of papers publishe d	9.00	32	29	26	22	19
[5] To build trained human resource in the field required by the country.	15.00	[5.1] To run the Ph.D. programme of the Institute through recruitment of Research Fellowships	[5.1.1] Recruitment of Research Fellows	number	3.00	9	8	7	6	5
