

PRODUCT OVERVIEW

J-Gate@ MoES Consortia

J-Gate

J-Gate is the most comprehensive database and gateway to access research information from over **60 Million journal articles (with access to 14 Million Full Text articles)** coming from **50,000+** journals covering multiple subject domains.

- All journals are indexed cover to cover with each article having links to full text.
- Articles carry author email addresses for the researchers to connect with them.
- Platform for configuring consortia subscribed, library subscribed and user's favorite journals.
- Unified platform to access all subscribed journals through a single interface.

J-Gate@ Consortia

J-Gate database customized to suit the needs of a consortia facilitating access to consortia subscribed journals as well as library subscribed journals through a single platform.

A search platform for scholarly articles plus resource-sharing facility for the members of the consortium. The resource sharing facility is limited to the journals available among the consortia members.

J-Gate@ MoES Consortia

A customized solution for Consortium to enable all member institutions to access all subscribed journals and full text journals available in J-Gate, through a single discovery platform and resource sharing among the institutions in case of unique subscriptions of the consortia as well as of member institutions.

#	J-Gate@ Consortia	Indexed Journals	Full-Text Journals
1	J-Gate Complete	50,000+	25,000+
2	Subscribed	All journals subscribed by Consortia as per access matrix.	
3	Available through Inter Library Loan	All unique journals subscribed by Consortia members.	

Features and Functionalities of J-Gate@ Consortia

1. **My Library Journals:** Single point access to all individual library subscribed journals by updating the journal holdings. Apart from links to the full text in the search results, one can also browse the archives of those journals.
2. **My Favorite Journals:** Enables the user to create own profile and configure favorite journals. Other benefits:
 - a. Search within favorite journals and avoid the results from other indexed journals.
 - b. Receive e-mail alert when there are updates in the TOC of your favorite journals.
 - c. Access J-Gate from outside the institutional IP using profile login credentials.
3. Single platform for search and accessing across libraries of Consortia members through customized discovery layers for **All Journals, Consortia Subscribed, My Library** and **My Favorite** journals for seamless access and effective usage.
4. **Filter Your Search:** Highly advanced post-search filters to narrow down search results based on select parameters. The user can filter the results by Subject, Author, Journal Name, Country of Publication, Year of Publication, etc.
5. **Starting Point of Research:** J-Gate aids the new researcher by providing the name of prominent authors and journals. This can be the starting point of search in case he wants to read more articles from those authors and articles published in those journals.
6. **Journal Finder:** This functionality would help to get the list of accessible journals as per rights and categorized under All, Consortia Subscribed, Library Subscribed and User Favorites. The users can also browse the list alphabetically by journal title, publisher name and aggregator packages.
7. **Browse TOC:** Users would be able to browse table of contents for both current and archival issues.
8. **Advanced Search:** Users would be able to use Boolean operators for advanced searching to include author name, author address, additional keywords, journal titles, etc.
9. **Download Citation Styles:** Users can directly copy the various citations styles easily and use it without hassle.
10. **Create/Manage Alerts:** Email & RSS alerts for latest Journal Table of Content.
11. **Personalized Folders:** Save your favorite articles in personalized folders for quick reference.
12. Easy to **Mark Favorite Journals** from the Journal Finder results page.
13. **Share with Peers:** Share your personalized folders with your fellow researchers / peers for collaboration and knowledge sharing.
14. **Inter Library Loan:** Sharing of subscribed journal resources among consortia members through inter library loan to facilitate resource sharing by sending e-mail requests. All documents shared through J-Gate have watermark of the consortium within which the document sharing is done.
15. **CONTU Report:** This functionality helps in adhering to CONTU Guidelines by displaying the inter library loan fulfilled counts allowed as per the guidelines.
16. **Easy Access Shortcuts:** Download / e-Mail / Print individual reference, directly from search results.
17. Indication of the **SciMago Journal Ranking** and **H-Index for journals** listed in SciMago Journal & Country Ranking. This helps researchers to effectively identify the journals for article submission.
18. **Post-Search Graphical Representation of Subjects and Journals:** Graphical representation of subject areas and journals from which the search results have been picked.
19. **Cloud based** system to ensure 24x7 accessibility.
20. **Separate Admin Interface** to configure resources, report analysis and effective access management.
21. **User Helpline** to share queries and seek help related to access and how to use.

J-Gate@ Consortia

Benefits to All Consortia Member Institutions

1. A single gateway to access consortium subscribed, member library subscribed and open access journals.
2. A resource sharing platform where the user can access journal articles required by him but not available in his library and held by other consortia members.
3. Avoid subscription of less used journals in your institutions and share the same with institutions where it is subscribed because of its excessive usage to avoid duplication of resources.
4. Analyze through the usage statistics of journals on this platform, identify journals less used and review their subscription within the library.
5. Promote usage of all the journals through a single interface and discover the content from other journals, which were never in the radar of the user.
6. The user of a consortium member can list their favorite journals to get alerts whenever these journals get updates.
7. The institute gets a Table of Content service with latest contents.
8. Access to bibliographic data of 50,000+ journals in multiple subject domain.
9. Daily update of the database maintains the currency, similar to the publishers.

Benefits to the Team Centrally Managing the Consortia

1. A single cloud based database having journal articles available in the libraries of all the institutions of Consortia.
2. Resource sharing platform for all journals to all the researchers of consortium member creating one single gateway to the library subscribed journals.
3. A metadata framework for entire consortia at one single place on the cloud accessible to all colleges.
4. Universal journal discovery service for all institutions of Consortia.
5. Avoid duplicate subscription among the consortia for less used titles.
6. Bibliographic access to all journals holding of all the members on one single platform.
7. A journal catalog of all Consortia Institutions libraries in one single place.
8. Provision for Document Delivery Request tracker - a platform to review which institute has requested articles to which other institutes and its fulfilment status to the end user and administrator.
